

SHARP is a tool that:

- supports a distributed workforce to work safely and efficient when at home.
- enables business leaders to manage the workplace by data rather than direct observation.
- provides risk mitigation for an operational activity (homeworking otherwise difficult to assure).

Stakeholder Benefits

To Employees - A risk assessment report for homeworking which identifies vulnerability and level of risk.

To Managers – Operational knowledge to support supervision and and the fulfillment of their duty of care.

To Leaders - Information to support strategic leadership and governance requirements e.g. Diligence

To Owners – Information to gain assurance of risk and threat levels and sustainable operational viability.
